INDEX

Title of the project
Online Video Streaming Website.

Introduction
As all of us know that online video streaming websites are becoming so much popular all around the world. This kind of website provide a sort of entertainment for the user. Netflix is the best example for Online Video Streaming website. On Netflix a user can watch video after registering. So, the same idea was implemented here where users can watch movies and TV shows for free after registering.

Existing System
The purpose of this project is to develop and implement an Online Video Streaming Website for online viewing of Movies and TV Shows, where a user can watch media online without wasting time to download each media which uses storage space on their machine. The current system has many flaws like Geographic Limitations, High Speed Internet Requirements, Outdated Library and more.

Proposed System
Online Movie Streaming project is related to same concept as Netflix or Amazon Prime Video where users can watch movies and TV shows online but, in our system, User can watch media for free with just one time registration without the restriction of Geographic Limitations, we keep our libraries updated to get you the latest and the best content.

Advantages
- *Watch for free.*
- *No Geographical Limitations.*
- *It's Ad free.*
- *Updated content.*
- *High Quality video playback.*
- *Device Compatibility.*

❖ *Simple and easy to use*

Disadvantages

❖ *Slow internet can cause lot of buffering (Client Side).*

❖ *New content is not available right away.*

Key Features

❖ *Seamless streaming experience.*

❖ *Huge content library.*

System requirements

	Windows requirements	Mac requirements	Linux requirements
Operating system	*Windows 8 or later*	*macOS Sierra 10.12 or later*	*64-bit Ubuntu 14.04+, Debian 8+, openSUSE 13.3+, or Fedora Linux 24+*
Processor	*Intel Pentium 4 or later*	*Intel*	*Intel Pentium 4 or later*
Memory	*2 GB minimum, 4 GB recommended*		
Screen resolution	*1280x1024 or larger*		
Application window size	*1024x680 or larger*		
Internet connection	*Required*		

Programming languages used

❖ *Operating System: Any*

❖ *Server Technology: PHP/XAMPP*

❖ *Database: MySQL*

❖ *Markup Language: HTML*

❖ *Scripting Language: CSS/JavaScript*

Entity Relationship Diagram

Entity Relationship Diagram is a graphical model of the data needed by a system, including things about which information is stored and the relationship among them, produced in structured analysis and information engineering. On the Entity Relationship Diagram. Rectangles represent data entities and the Lines connecting the rectangles show the relationship among data entities.

ERD Notations:

Rectangle:

Represents Data Entity.

Circle:
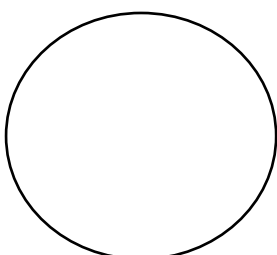

Represents Connection.

Diamond:
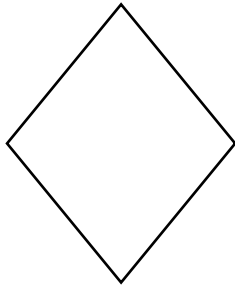

Represents the process
Or
Relation between two entities.

Line:

Connects two entities, also
helps in showing relationship.

Entity Relationship Diagram

Event Table

The event table is a table of data that is typically written to the logfile for each scenario and also appears in the Analysis window. The event table contains timing information about specific events that occur during the scenario.

| Event	Trigger	Source	Activity	Response	Destination
User signup	Processing signup details	User	Saving signup details	Details saved	Database
User sign in	Processing sign in details	User	Validating user details	Details validated	Database
User browse for Movies/TV shows	User selects from listed Movies/TV shows	User	Movies/TV shows selection	Movies/TV shows selected	Database
User search for Movies/TV shows	User searching for Movies/TV shows	User	Searching of Movies/TV shows	List media titles that match the input	Database
Generating confirmation of user registration	User confirms registration	Automated email system	Generating confirmation email	Confirmation sent through email	Email id given by user during signup

Event Table

Flow Chart

A flowchart is a type of diagram that represents a workflow or process.
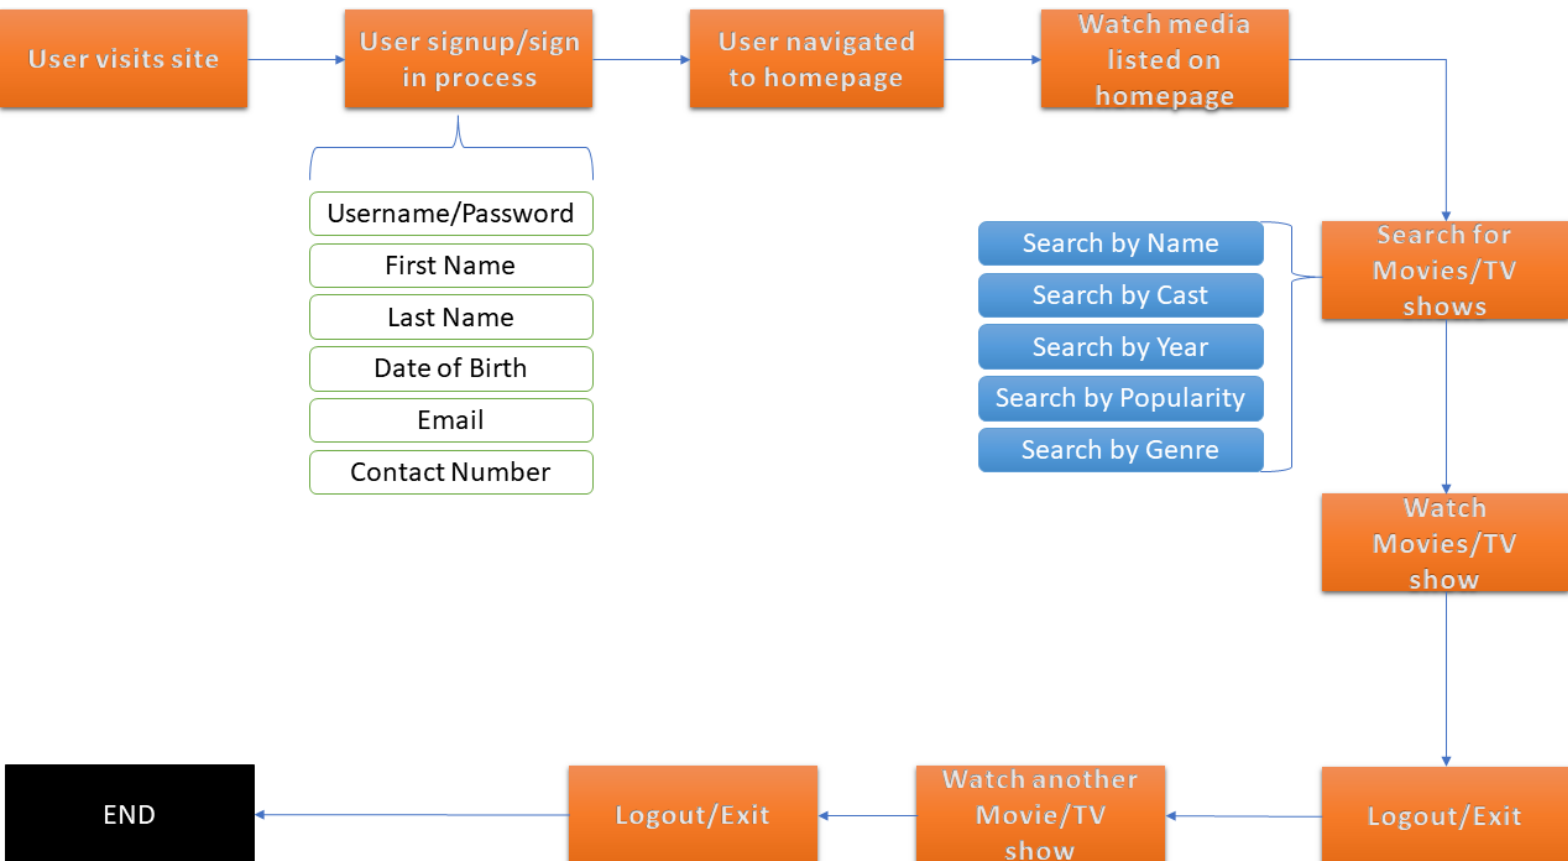

Flow chart

Class Diagram

A class diagram in the Unified Modelling Language is a type of static structure diagram that describes the structure of a system by showing the system's classes.
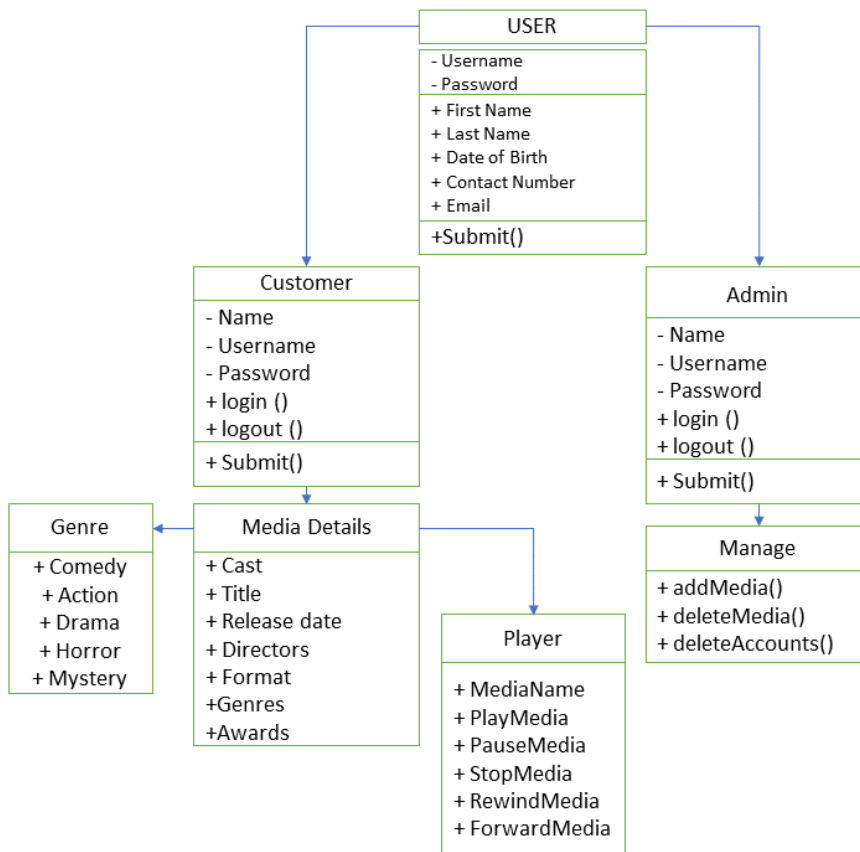

Class Diagram

Use Case Diagram

A use case diagram is a graphical depiction of a user's possible interactions with a system.

This show focuses on Queen Elizabeth II as a young newlywed faced with leading the world's
most famous monarchy, while forging a relationship with legendary Prime Minister Sir Winston
Churchill. The British Empire is in decline, the political world is in disarray, but a new
era is dawning. Peter Morgan's masterfully researched scripts reveal the Queen's private
journey behind the public façade with daring frankness. Prepare to see into the coveted
world of power and privilege behind the locked doors of Westminster and Buckingham Palace.
